

Welcome To Our Presentation

Let's get to know about GITHUB.

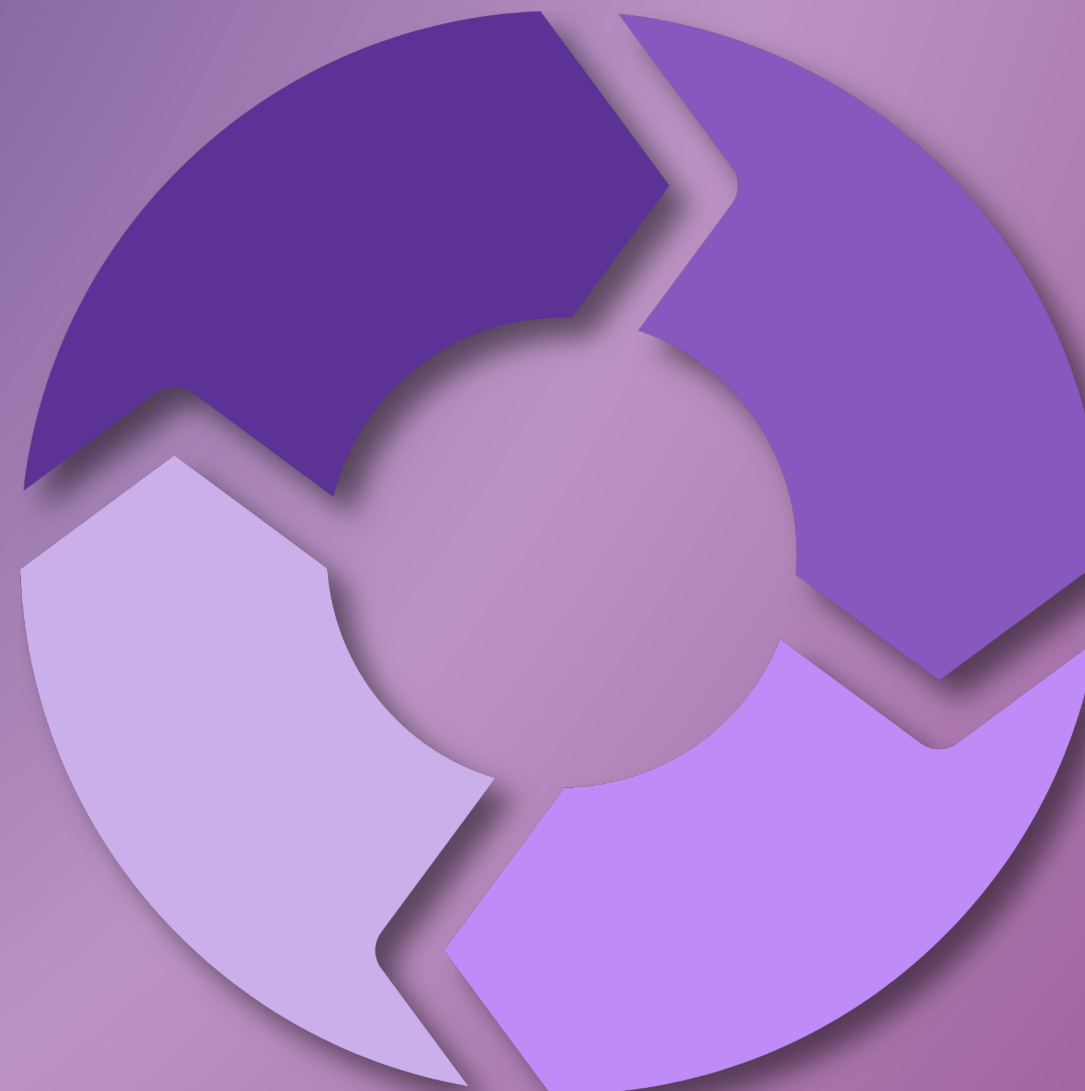

What is GITHUB?

**Github is a web-based
hosting service**

**It is mostly used for
computer code**

**for version control
using git**

**It offers all the
distributed version
control and source code
management functionality
of Git**

HISTORY OF GITHUB

Github was founded in April 2008 by Tom PrestonWerner , Chris Wanstrath, and PJ Hyett.

As of January 2019, Github offers unlimited private repositories to all plans, including free accounts.

Popular features of Github

- It includes bug tracking, feature requests, task management, and wikis.
- Github has an extensive community.
- Github Pages and Github Gist are also popular features.
- built around open-source projects hosted on the site.

GITHUB TODAY!

- Github was acquired by Microsoft in June 2018

- As of June 2019, Github had over 37 million users

- It is currently the largest host of source code in the world

- There are over 100 million repositories hosted on Github

Thank You

for your attention
